Gives students a rough indication of how they have done before feedback in live meeting

★ means over and above

👉 means notes are all fine

NB means that they are incomplete or there has been a problem and the student should go back.

The screenshot shows a digital assessment interface for 'PRODUCT: LEGO'. The interface includes a top toolbar with icons for zooming, drawing, erasing, commenting, and grading. The main content area is divided into sections: 'MATERIALS' and 'MANUFACTURE – 8 MARK QUESTIONS'. The 'MATERIALS' section asks for a suitable material and two properties. The student has handwritten 'acrylonitrile butadiene styrene' and two properties: 'very tensile strength - this is important as it has to be strong enough to withstand a strong pressure and not break' and 'also can be coloured in any colour - this makes it suitable for children and aesthetically pleasing'. The 'MANUFACTURE' section asks for a prototype and relevant equipment. The student has handwritten 'rotational moulding' and a diagram showing a plastic sheet being heated to 300°C with rotation, then cooled in a station with fans, and finally removed from the mould shape. A feedback overlay is visible on the right side, showing a star icon, a grade of 'Total', and a comment field. The overlay also contains text: 'You can set one grade per student in an assignment. All elements are optional and can contain any value.'
